## Profile

---

A graduate in Electronics and Communication Engineering with hands-on experience in WordPress development, frontend design, and UI/UX. Skilled in building responsive websites using HTML, CSS, JavaScript, and Elementor, with basic working knowledge of React.js. Proficient in Python, C, and version control tools like Git and GitHub. Passionate about clean design, team collaboration, and learning new technologies to solve real-world problems.

## Skills

---

### Programming Languages

HTML, CSS, JavaScript, React, C, Python

### Softwares & Platforms

Linux, Wordpress, Microsoft Office Suite

### Version Control

Git, Github

## Projects

---

### E-commerce website

- Developed a fully responsive eCommerce website using HTML, CSS, and JavaScript, showcasing modern UI/UX principles and product display layouts.
- Implemented interactive features including product filtering, navigation, and hover animations to enhance user engagement.

### Portfolio Website

- Designed and built a personal portfolio website using HTML, CSS, and JavaScript to showcase projects, skills, and contact information in a clean, professional layout.
- Integrated smooth scrolling, hover animations, and responsive design for an engaging and accessible user experience across devices.

### Cleaning Automation Technology using Arduino uno

- An automated vacuum cleaner bot using Arduino uno and L293 motor driver
- Contributed in the software and programming part of the project
- Implemented obstacle detection and navigation logic using ultrasonic sensors to enable autonomous movement and efficient cleaning paths.
